

Capabilities Statement

LED Lighting Solutions (LLS) proudly serves commercial, industrial, institutional, municipal, and government clients with our full lineup of LED lighting products. Products are the **greenest** available, each better than **100 lm/w**, including our LED: site/street, flood, wall pack, high/low bay, site retrofit, canopy, and solar luminaires. We currently have GSA schedule contract **GS-07F-025BA**. Our products are all Design Light Consortium listed, which is the Energy Star equivalent for commercial LED.

LED Lighting Solutions, LLC has pioneered LED lighting in the US since 2010. We have provided premium site and interior lighting, while advancing the technology. We are owned and operated by a professional engineer with 15 years of experience in design, construction, and product supply for commercial, industrial, government, and institutional properties. Our products are industry leaders for their exceptional efficiency as well as quality, and reliability.

LLS core competencies are focused in four key areas:

Performance

- High quality products direct from LLS and our manufacturers
- Consistently deliver 60-93% energy savings
- Fastest Returns on Investment
- **Greenest lighting products** available with lowest carbon footprint

Dependability
